MEMORANDUM FOR THE RECORD

25X11A

SUBJECT: Visit to Strategic Air Command, Omaha by
[redacted] on 8 August 1956

1. This is to record the visit of the undersigned to the SAC Headquarters on 8 August 1956. This trip was in connection with:

a. The finalization of procedures governing control of security identification papers and badges issued by SAC to the Project Security.

b. The security significance and problems applicable to the follow-on program, in particular, clearances and processing of training groups.

2. The procurement of identification documents was favorably reviewed and finalized. A degree of backstopping is yet to be accomplished. SAC personnel, probably Lt. Col. Boyd White, Deputy Provost Marshall, will advise when this has been completed.

3. The problem of the follow-on procurement and clearances for this activity seems to revolve around a lack of information exchange. An emergency arrangement for follow up on important cases was established by virtue of furnishing Col. Paul Heron and Maj. Glen Dunlap the sterile office phone number of the Project Security Office.

4. In addition to those mentioned above, the following SAC officers were contacted during review of the outlined problem: Col. John Proctor, Chief of Special Systems Division; Col. Smith, Deputy Chief of Staff, Intelligence and Col. Petroff, SAC Intelligence.

5. A side issue noted during the discussion was a considerable thirst for information regarding Project and follow-on program planning, in particular our plans for phasing out of [redacted] 25X1
 Cols. Proctor and Heron were advised that current Project thinking indicated a need for a considerable degree of latitude in connection with termination of our interest in [redacted] and accordingly the 25X1
 SAC proposal for establishment of the follow-on at MeDill was receiving a major degree of consideration. Further, that very probably following our week of decision commencing 13 August specific guidance would be afforded the Command as to our Project schedule.
